But, when I started using it, I quickly found that the character (or "shortcut" to use the correct term) didn't match what I was typing into the program, like the keyboard shortcut it was supposed to match. I was pretty disappointed, so I gave up using it. It would be nice to have a stable version of this so that it works like it should. Great app, but for a price? So of course I downloaded and enjoyed using it. But, when I started using it, I quickly found that the character (or "shortcut" to use the correct term) didn't match what I was typing into the program, like the keyboard shortcut it was supposed to match. I was pretty disappointed, so I gave up using it. It would be nice to have a stable version of this so that it works like it should. Pretty much best thing going and wish there were more apps like it Available on my Mac and Windows 10. I would have given 5 stars if there was a version for other apps! Just wish there were more apps like it! Would purchase for \$1.99 per year Would really like the ability to input Arabic into a number of programs. I need to enter Arabic in databases in Excel, Adobe InDesign, etc. Also, a little of it in PowerPoint and Word.
